

## Check Points in the demo environment

This document summarizes points for testing in the demo environment.

### 1. Check Method

- Demo/testing trade should be conducted in the demo environment\*. In the demo environment, **"This is DEMO mode. Any transfer will NOT be executed."** is displayed in yellow bar under the browser display.  
\* Please refer to "3. Guide for demo environment."
- For checking demo/testing trades,  
When using GUI, please refer to "CONNEQTOR GUI Operation Manual for Market Makers" and "(Reference)Checklist for GUI testing (Market Maker)".  
When using API, " CONNEQTOR API Operation Manual for Market Makers ",  
"(Reference)Checklist for API testing (Market Maker)"
- **Investor User (dummy) will be provided for demo/testing.** Please send Request for quote (RFQ) by dummy investor, confirm RFQ ID and quote by market maker user.
- **"TSE Securities"; dummy broker, is set as your broker** for both accounts; dummy investors and market makers (GUI/API).  
When you do demo/testing trade, **please select "TSE Securities" as a broker.** You can experience all flow to execution.

### 2. Noted

- Please try CONNEQTOR demo as you like, as **your demo/testing trade will not be actually executed** even if you Approved on CONNEQTOR demo.
- In the demo environment dummy investors and market makers; program responds automatically, are sending RFQs/quotes, so other RFQs/quotes may be displayed on your screen.
- When using GUI, you can select the broker you registered, but in the demo environment, you cannot check to execute by the real broker.
