

- Please obtain the application form from the CredNex portal site
<https://jpxsystem.com/doc/etfpf/doku.php?id=application-form-en>
- Please submit the completed application form by e-mail to;
ask-crednex@jpx.co.jp

List of Application Forms

	User registration for test env.	Registration for production env.	API usage application	Issue Master	AP Master	Dummy Account	Registration of MM to be handled
Outline	Apply for admin contact and users to use test env.	Apply for users to use production env.	Register IP address and be assigned API-key	Apply for ETFs to be handled by CredNex	Designate APs for each issue	AM request IDs to operate as a dummy AP or TB in test env.	Apply for MM to be handled by the AP
Application ID	New:UT-11, UT-13(MM) Add/Delete: UT-51,52	UT-21 UT-23(MM)	[TEST]UT-12, UT-13(MM) [PROD]UT-22, UT-23(MM)	[TEST] AMT-11 [PROD] AMT-12	[TEST] AMT-21 [PROD] AMT-22	UT-53	[TEST] APT-11 [PROD] APT-21
AM	○	○		○	○	○ (optional)	
AP	○	○	○ (optional)				○ (agency only)
TB	○	○					
MM	○	○	○				

1 . Application for test environment

User registration* ¹ /Administrative contact registration	UT-11 Start use for test	• Register your organization information • Register users who will use the test env. • Register the administrative contact person who will be the point of contact for the application
API usage application (optional)	UT-12 API usage in test env.	• Register the IP addresses for assigning the API-key in the test env.*²

2 . Application for test environment

User registration* ¹	UT-21 Start use for production	• Register users who will use the production env.
API usage application (optional)	UT-22 API usage in production env.	• Register the IP addresses for assigning the API-key in the production env.*²

Notes:

1. Please apply for AP prop desk as AP, not MM, even if you are market making. It is possible to select “Application” or “Approval” authority for each user. Please refer to P.7 for details on authority.

2. Basically, please specify individual global IP address(es), not the range, for API usage.

1. Application for test environment

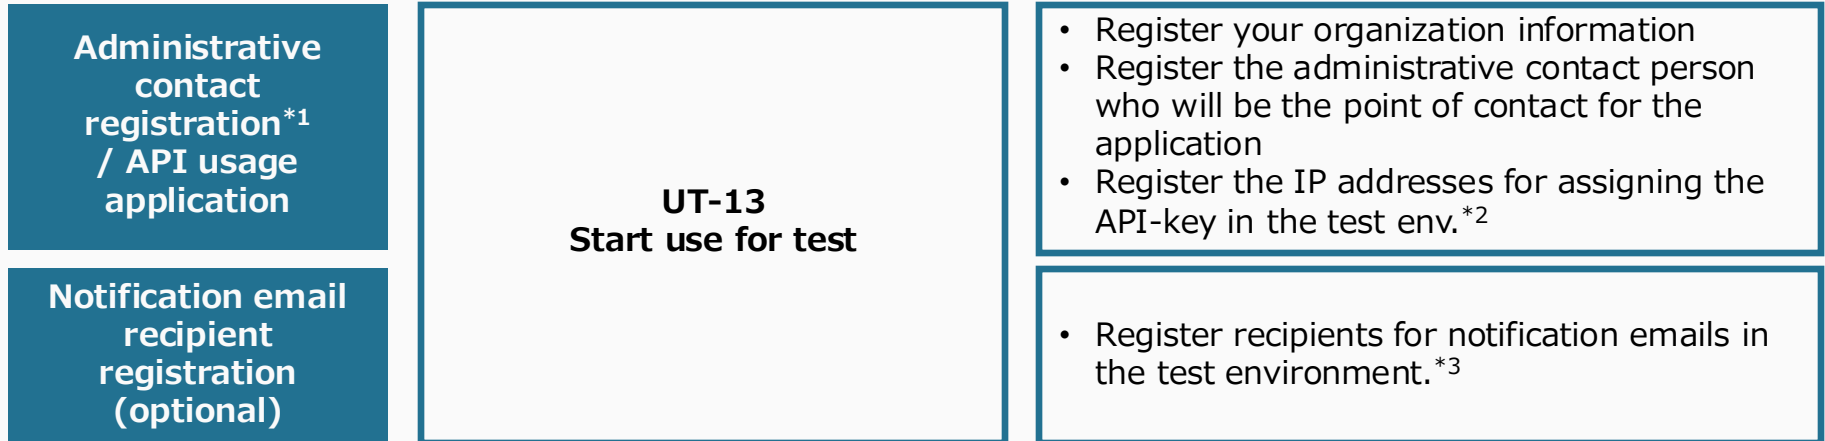

User registration / Administrative contact registration	UT-11 Start use for test	• Register your organization information • Register users who will use the test env. • Register the administrative contact person who will be the point of contact for the application
API usage application (optional)	UT-12 API usage in test env.	• Register the IP addresses for assigning the API-key in the test env.*¹
Registration of MM to be handled	APT-11 Client registration for test	• Register MMs who designate the AP as the agency of creation and redemption application in the test env.

2. Application for test environment

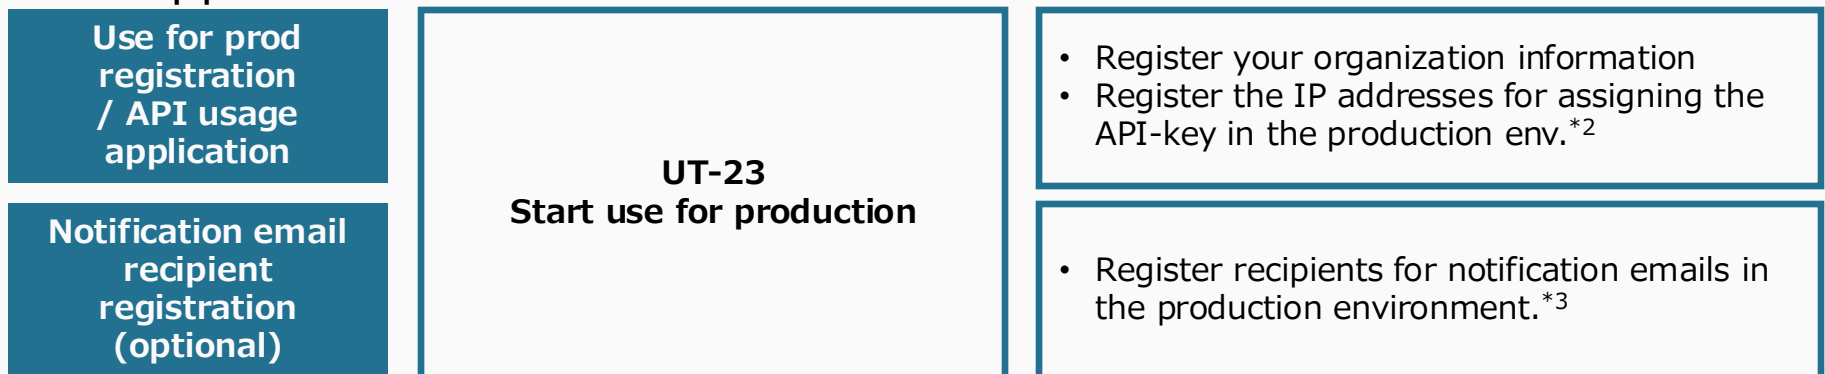

User registration	UT-21 Start use for production	• Register users who will use the production env.
API usage application (optional)	UT-22 API usage in production env.	• Register the IP addresses for assigning the API-key in the production env.*¹
Registration of MM to be handled	APT-21 Client registration for production	• Register MMs who designate the AP as the agency of creation and redemption application in the production env.

Note1: Basically, please specify individual global IP address(es), not the range, for API usage.

2. Application for test environment

Notes:

1. Please apply for AP prop desk as AP, not MM, even if you are market making.

2. Basically, please specify individual global IP address(es), not the range, for API usage.

© 2025 Jpx 3. For the timing of notification email, please refer to the “CredNex Operation Manual_Appendix_Status Definitions”.

- Available operations differ for each organizational category as shown in the table below.
- It is needed for prop AP to select either “Application” or “Approval” authority for each IDs.

	AP (prop)		AP (agency)	AM	TB	MM※ ³
	Application	Approval				
Application	☐		☐			☐
Approve application		☐	☐	☐		
Register statement				☐		
Approve statement					☐	
Register information* ¹				☐		
Get information* ²	☐	☐	☐	☐	☐	☐ ※ ⁴

Notes:

1. Blackout dates and issue master can be registered.
2. Application details(e.g. status), blackout dates and issue master can be obtained.
3. Only the Web-API is available. The GUI is not available.
4. Application details can be obtained only when the application is applied directly on CredNex; when an AP applies on behalf of MM, only the blackout dates and issue master can be obtained.

- The “Administrative Contact” to be registered on the UT-11 should be the contact person(s) for all applications. Please note that for security reasons, applications from persons other than the “Administrative Contact” will not be accepted.
- The e-mail address provided when creating the ID will be used for 2-step verification for log-in and notifications (C/R application status updates, emergency notifications, function update notifications, etc.), so please be sure to specify an e-mail address with your understanding. In addition, multiple IDs can be obtained with a single e-mail address; basically, an e-mail address is used for the ID, but if multiple IDs are registered with a single e-mail address, the IDs will be numbered and assigned so that they can be distinguished by ID. (Example of ID numbering: (1) ask-crednex@jpx.co.jp, (2) ask-crednex2@jpx.co.jp) If a single email address is registered for multiple IDs within the same organization*, only single notification email from CredNex will be sent.
*The AP prop-desk and agency-desk are treated as separate organizations. Also, the application authority and approval authority IDs for the AP prop-desk are treated as separate organizations. If the same e-mail address is registered for different organizations, multiple notification e-mails with the same content may be sent.
- Sharing the ID is not recommended; if you use one ID to log in from two or more terminals at the same time, you may experience unexpected behavior such as being forcibly logged out after a certain period of time.
